MAMMOTH CAVES IN ARIZONA.
The Existence Officially Announced by Archaeologist.

Denver, Col., July 24.—That mammoth caves, containing caverns large enough in which to place a city office building, with natural stone bridges exceeding in beauty and grandeur those of Utah and Virginia, exist in northwestern Arizona, is officially announced by Professor Edgar T. Hewett, director of the branch of the school of Mexican archaeology, located at Santa Fe, N. M.

Stories of the existence of these wonderful natural caverns have been told by Indians of that section for centuries, but were thought by white men to be merely legends of the aborigines.
